PDF To XML

PDF to XML is a Windows software application that is designed to convert PDF files into XML files. This handy utility helps you to import the files without needing to use Adobe Acrobat, Acrobat Pro or the Adobe Reader. Just insert the PDF files, select the output directory and type the desired title for the XML document, and press the Convert button. You can either immediately use the XML files or save them as TAR files, HTML files or TXT files to be sent to other parts of your computer or to a server on the Internet. By the way, it should be noted that the process does not alter the original layout of the text and graphics. You can therefore use the converted files in your web pages and save the PDFs in a standard ZIP archive for users who access your site on the Internet.
